Aim

Innovate, build, promote and teach about technology innovation.
Programming is not a hobby or job, is a life style.

Last Conferences and another

Open web development

Speaker

SIECC 2011

*Noviembre, 2011.
Durango.*

Mozilla México

Speaker

Mozilla Summit 2010

*July 6th, 2010
Whistler, B.C., Canada*

Last Professional experience

Llorsat

Senior developer

Development of an ERP completely in Javascript, compatible with HTML5 standars, currently we are using Backbone, Handlebars, jQuery and a lot of other Javascript libraries to build our product and at same time we're building a kind of framework to make much faster the development.

México city

March 2012 - Currently

Noster

CTO

I was CTO in this company, building the iphone app, api and webapp of this product, we went to USA to ask for funding. I deployed new features on daily basis to support customers needs. The technologies I was using was Apple iOS SDK, Django, Piston, Postgresql, Javascript, HTML5 and CSS3. This project concluded after two years of hard work.

December, 2010 - March, 2012

Mozilla México

Development area leader

In Mozilla I was open web evangelist and developer for Mozilla's labs department. I didn't receive an actual payment for my contributions here, but I loved this project because it was my first international project where I got the chance to do code contributions in Python - a language I love. I developed extensions in both Python and Javascript for Firefox's Addon SDK, to enhance user experience and tools.

March, 2008 - Actually

ASI

Junior developer

My first job in site, developing Geolocalization and tasks automatization applications for a company based on energy safe programs, in this company I was developing in Python for server side and just a few frontend-backend projects.

Mérida, Yuc.

May, 2010 - August, 2010
